

Our vision at Micro Update is simple - we will offer all our customers a service that is both personalised and professional - we will always go the extra mile. There are many website businesses that offer solutions but you never get to meet the faces behind the scenes. We believe that the best way to provide a service for our customers is to meet them and understand their requirements and objectives. This continues to create a relationship that proves that we mean to provide you with an excellent service that is personalised and professional. We will:

- Always meet you in person and discuss your requirements without any charges or costs to you
- Help you to understand the technology and your objectives
- Provide you with a road map of where you are and how we will get you to where you want to be
- Keep you in the picture all the way through the development process so that there are no hidden surprises
- Guarantee that you will have direct contact with your project manager at all times
- Help and continue to provide our services after delivery if you do not have the internal resources

At Micro Update we pride ourselves on being able to offer you a wide range of services centered around your online presence on the Internet - in all areas, whether that be a website, mobile phone application, social networking activities, bespoke programming, marketing and photography services or any other aspect of your business that requires online services.
