

When it comes to managing and looking after your **domain and hosting**, Micro Update offers you full comfort that your website and web services are fully managed. Any domains hosted by us are **fully backed up** on a regular basis.

As standard all our **web packages** include the following:

- POP and IMAP email accounts
- A webmail client to access email if required
- 160+ one click installs of the best web based software including wordpress and other popular software
- MySQL databases
- Linux or Windows Hosting
- FULL UK support
- FULL FTP Access to your account
- Your own control panel to manage your domain at any time
- FULL backup of your site
- FULL **web analytics** for your websites performance and statistics
- FULL support for Perl, PHP, MySQL, Python, ASP and ASP.NET (Windows Only) and SSI (Server Side Includes)

Our domain and hosting is included with all our [web design packages](#) . If you would like us to manage or take over management of your existing web hosting or domains please **contact us**
